Custom built comfort

The Prestige Curve is hand built in the UK, to the exact measurements of your staircase, with the carriage being fully adjustable to your size and body shape.

Twists, turns and corners are no problem for your Curve, as the rail is tailor made to your individual stair-case. With the Prestige Curve, you get a smooth, safe, comfortable ride and the freedom of your house once more.

In addition, the Curve's compact design and floor-mounted rail means it takes up as little space as possible and does not affect your home's decor.

For curved staircases, there is no better option than the Prestige Curve.

Curve with ERGO Space seat and ERGO Plus pad.

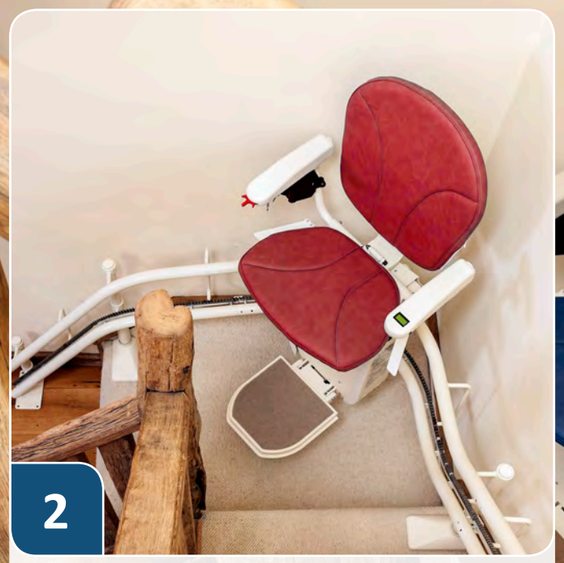
CURVE

Reduce a whole staircase down to five simple steps

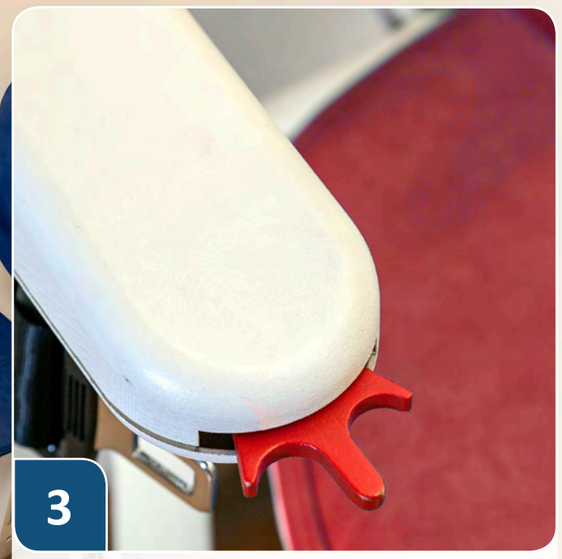
1

Lower the arms and the seat pad, put the footplate down and your Curve stairlift is ready to use. The digital diagnostic screen will display `Prestige´ meaning you are ready to go.



2

Your Curve chair will be fully adjusted to your size and shape at installation, so all you need to do is strap yourself in, sit back, relax and enjoy the ride!

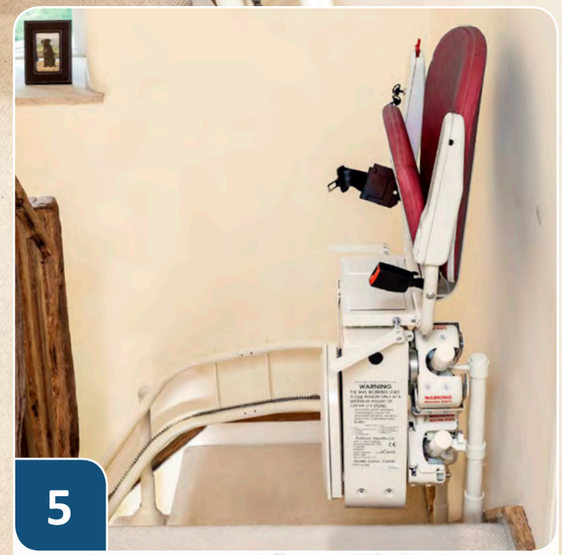


3

To operate your Prestige Curve stairlift, simply use the ergonomic joystick in the arm and lightly press in the direction you wish to travel.

4

At the top of the stairs, use the side-mounted swivel lever (or optional powered swivel), to turn the chair and safely step out onto the landing.



5

When not in use, your Curve stairlift can be folded and parked on the stairs, leaving clear access for other family members.

ERGO

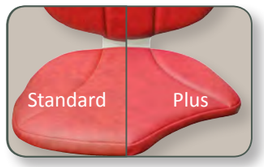
The Prestige ERGO seat is one of the most advanced stairlift seats available. The ERGO is fully adjustable to the size and shape of the user and comes with a wealth of built-in features. The ERGO seat comes as standard on the Curve. Ask your distributor for more details.

Ergonomic Joystick
Total control at your fingertips.

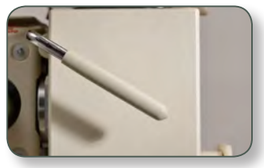
Digital Arm Display
Easy to read, real-time diagnostics.

Security Lock
Prevent unauthorised use of the lift.

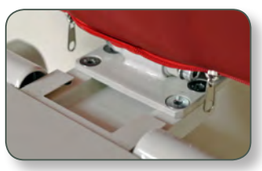
Retractable Safety Belt
Additional safety when lift is in operation.



ERGO Seat Pad
Short or tall, ERGO fits all.



Lever Linked Footrest
Open and close with ease. Powered option also available.



Adjustable Seat Back
Allows for horizontal adjustment of the seat back. Combined with the multi-position seat pad, the ERGO offers multiple configuration options.

Safety Edge
Senses obstructions and brings the chair to a stop.

Weight Limit
120kg
(19st)

ERGOSPACE

The compact ERGO Space seat is designed for narrow staircases, providing an extra 60mm of space compared to the standard ERGO seat. When used with the ERGO Plus seat pad, the Space seat reduces the area needed to operate by a further 25mm, a total saving of 85mm.

The Space seat's back rest is 80mm shorter than the standard ERGO seat and curves around the user, delivering both comfort and practicality when space is at a premium.

Weight Limit
120kg
(19st)

ERGOHD

The bariatric ERGO HD seat offers all the features of the standard ERGO but with an increased weight capacity of up to 160 kg (25 stone).

Bariatric chairs often sacrifice visual appeal for their ability to accommodate larger users but not the ERGO HD! Size, shape, seat height and aesthetics are identical to the standard model, with all increased load bearing mechanisms cleverly hidden inside the chassis.

Now everybody can enjoy ERGO comfort.

Weight Limit
160kg
(25st)
