FLOW X

Which?
Trusted trader

A COMBINATION OF INNOVATION AND FUNCTIONALITY, FLOW X IS OUR MOST COMPLETE SINGLE RAIL CURVED STAIRLIFT

SEAMLESS MOVEMENT

Designed for seamless movement, the Flow X provides outstanding levels of comfort, confidence and craftsmanship. Our most space-conscious stairlift, Flow X is designed to blend into your home effortlessly. Flow X is fitted onto your staircase and not your wall, allowing it to be installed quickly and efficiently, with minimum disruption to your home.

COMFORT

The Flow X redefines premium comfort. It offers ergonomic and innovative features, all detailed with you in mind. The backrest and padded seat are specifically designed with a gentle recline which, combined with its height, adjustable seat and footrest, promote a natural, comfortable seating position, tailored to you.

Designed for effortless living, Flow X is available with complete automatic folding at the push of a button. This unique feature allows Flow X to do the work so that you can sit comfortably and enjoy its benefits from start to finish.

Experience the comfort of Flow X and choose from our collection of contemporary high-quality fabrics and finishes to make your lift truly part of your home.

CONFIDENCE

The Flow X stairlift is designed and tested to the highest standards (Machinery Directive 2006/42/EC and EN 81-40), to give full confidence as you move around your home.

Flow X's innovative armrests provide several key benefits. They have an ergonomically-tapered form, designed to give you extra support both when standing and sitting. Thanks to the unique open-access armrest position, transferring to a stairlift has never been easier. Lastly, the smart detection device in the armrests prevents movement when the armrests are not in the correct position, providing full peace of mind.

During travel, Flow X's one-handed operation seatbelt and wraparound armrests keep you secure throughout. You can rest easy as the colour-coded indicator lights put you in control, so you always know that your lift is working correctly.

Flow X offers you an optional integrated call device feature (programmable up to three numbers), to ensure you can stay connected with friends and family when you're using the lift.

CRAFTSMANSHIP

Flow X is our most complete curved stairlift. It has been designed to blend innovation with an inspiring contemporary design by Pearson Lloyd.

When you choose the craftsmanship of Flow X, you ensure a superior fit for you and your home. You receive a sleek, contemporary lift with options tailored to you, with all mechanical elements elegantly kept out of sight. You benefit from our most compact lift, with our most generous, comfortable seating design. Enjoy a smooth and safe ride, as our ASL technology keeps Flow X perfectly level while it rotates during travel, ideal for staircases as narrow as 610mm.

COMPACT AND DISCREET

WHEN FLOW X IS FOLDED, ALL MECHANICAL ELEMENTS REMAIN ELEGANTLY OUT OF SIGHT

When not in use the Flow X is folded away to only 340 mm on any landing, out of the way of other staircase users. The Flow X has a single discreet rail that closely follows the line of your stairs and can be fitted on either side of your staircase.

OUR UNIQUE ASL TECHNOLOGY ENABLES THE FLOW X STAIRLIFT TO ROTATE AND STAY PERFECTLY LEVEL WHILE IN MOTION. BY ROTATING DURING TRAVEL, YOU'RE ALWAYS IN THE SAFEST AND MOST COMFORTABLE POSITION.

AUTOMATIC SWIVEL AND LEVELLING TECHNOLOGY

Manufactured using the very latest technology, the Flow X can be installed on nearly any type of staircase. The automatic swivel and levelling technology (ASL) allows the Flow X to be fitted on staircases as narrow as 610 mm. This feature, unique to the Flow range, enables your stairlift to turn while in motion, making it one of the most adaptable stairlifts in the world.

Internal or external rail on the narrowest and steepest stairs.

Even in cases where the staircase is narrow and steep, the Flow X can be installed closer to the step and on either side of the staircase. Your stairlift will be less obtrusive and your staircase remains accessible for other family members in your home.

Unique technology that can only be found with the Flow range

Your well-being is important to us – when you choose ASL technology the footrest swivels with the seat ensuring your legs and feet remain in a natural and comfortable position, relieving any additional strain on your joints.

The seat is always in the correct position to get on and off safely

The Flow X swivels as it travels, this means that getting on and off the lift at either end of the staircase is quick and easy. At the top of the staircase the seat can rotate away from the open staircase, allowing a safe exit from the seat.

Constantly working to save you time and provide safety and comfort

ASL technology operates while the lift is moving. Therefore you avoid additional stops and swivel movements at the beginning, during and at the end of the ride. This saves time and provides additional safety and comfort. The lift really moves in one “Flow”.

ASL TECHNOLOGY ENABLES THE FLOW X STAIRLIFT TO ROTATE AND STAY PERFECTLY LEVEL WHILE IN MOTION. YOU’RE ALWAYS IN THE SAFEST AND MOST COMFORTABLE POSITION.

COMPLETE AUTOMATIC FOLDING

Using a stairlift has never been easier with Flow X's complete automatic unfolding, at the push of a button. A unique feature only available with Flow X.

Choose between a fully automatic folding seat, automatic folding footrest or our innovative manual-folding version. The seamless movement of the manual folding is supported by an integrated gas spring that is discreetly hidden within the seat.

DESIGNED WITH YOU IN MIND

CALL DEVICE

Stay connected with friends and family with up to three different telephone numbers contactable directly from your stairlift.

JOYSTICK

With a comfortable soft-touch grip, the integrated joystick is designed for you to fold away neatly in the armrest when not in use.

Standard Drop Nose

The standard drop nose is the perfect solution if there is an obstruction such as a door near to the bottom of the stairs. The drop nose requires just 175 mm of space from the bottom step.

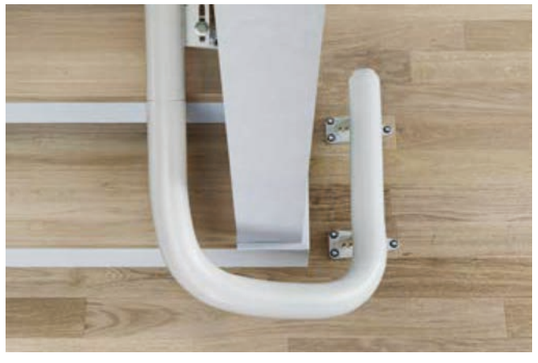
Vertical ‘Short-Start’ Drop Nose

Where space is even tighter at the bottom the ‘short-start’ drop nose can be installed, needing only 100 mm of space from the bottom step.

Horizontal Overrun

Where you have extra space at the bottom of the stairs the horizontal overrun allows the chair to be parked away from the bottom step.

Parking Curve



A parking curve allows the chair to be parked neatly out of the way of the stairs.

CALL AND PARK

Intuitive remote control units at the top and bottom of the stairs are used to call your lift and to send it to a parking point when not in use. With a modern handheld design and a clear status indicator that mirrors the stairlift, calling and parking has never been more convenient.

SPECIFICATION
